

BarangayLink - Builder Manual

A complete guide for Builders (Senior Staff).

Your Role

As a **Builder**, you're a senior team member with more responsibility than regular workers. You can create tasks, help organize work, and take on leadership within projects.

Think of yourself as a team lead - you do hands-on work but also help coordinate and break down bigger assignments into manageable pieces.

Getting Started

Your Dashboard

When you log in, you'll see: - Tasks assigned to you - Projects you're involved in - Tasks you've created for others - Notifications and updates - Your productivity stats

Your Access Level

You can: - Create tasks within projects you're assigned to - Assign tasks to yourself and teammates - Update task status - Log time on tasks - Add comments and collaborate - View project details and progress

You cannot: - Create new projects (Managers do this) - Access projects you're not assigned to - Approve or reject other people's work - Change user permissions

Working on Tasks

Your main job is completing assigned tasks.

Finding Your Tasks

1. Go to **My Duties** - See everything assigned to you
2. Or check **Dashboard** - Quick overview
3. Tasks are sorted by priority and due date

Starting a Task

1. Click on the task
2. Read the description carefully

3. Click **Start** or change status to **In Progress**
4. The timer starts automatically

While Working

As you work: - Update progress if it takes multiple days - Add comments if you have questions - Upload files if relevant (photos, documents) - Log additional time if needed

Completing a Task

When you're done: 1. Open the task 2. Add any final notes 3. Attach any deliverables 4. Change status to **In Review** 5. Your manager will check it

If Something Is Wrong

If you can't complete a task: 1. Don't just leave it 2. Add a comment explaining the issue 3. Message your manager 4. They'll help solve it or reassign

Creating Tasks

As a Builder, you can create tasks to help organize work.

When to Create Tasks

- Breaking a big task into smaller pieces
- Adding something you noticed needs to be done
- Delegating part of your work
- Creating follow-up tasks

How to Create a Task

1. Open the project
2. Click + **Add Task**
3. Fill in:

Title - Be specific - Good: "Measure road width at Purok 3 intersection" - Bad: "Measure"

Description - Explain what needs to be done - What's the goal? - Any specific instructions? - What's the expected output?

Assigned To - Yourself - A teammate - Multiple people (for collaborative tasks)

Due Date - When should it be done?

Priority - Match the parent task or project priority - Or adjust based on urgency

4. Click **Create**

Assigning to Others

When giving tasks to teammates: - Make sure they have capacity - Be clear about expectations - Set reasonable deadlines - Be available for questions

Using the Kanban Board

Visual way to see all tasks.

Accessing the Board

1. Open your project
2. Click **Kanban** or **Board View**
3. See tasks organized by status

Understanding the Columns

- **To Do** - Tasks waiting to be started
- **In Progress** - Currently being worked on
- **In Review** - Finished, waiting for manager review
- **Done** - Completed and verified

Moving Tasks

Drag and drop to change status: - Pick up a task card - Drop it in the new column - Status updates automatically

Filtering

Use filters to focus: - **My Tasks** - Just yours - **By Priority** - Urgent first - **By Due Date** - Upcoming deadlines

Time Tracking

Keep track of your work hours.

Automatic Tracking

When you click **Start** on a task: - Timer begins automatically - Tracks how long you work - Stops when you change status or pause

Manual Time Entry

If you forgot to start the timer: 1. Open the task 2. Click **Log Time** 3. Enter:
- Hours worked - Date - What you did 4. Save

Why Time Tracking Matters

- Shows your productivity
 - Helps with project estimates
 - Required for some reports
 - Demonstrates your contribution
-

Collaboration

Work effectively with your team.

Comments

Use comments for task-related discussion: 1. Open any task or project 2. Scroll to comments 3. Type your message 4. Use @name to notify someone

Good comment examples: - “Completed the survey, found 3 problem areas. Photos attached.” - “@Juan can you check if we have extra materials?” - “Blocked - need access to the gate. @Manager please advise.”

Attaching Files

Share documents and photos: 1. Open the task 2. Click **Attach** or drag files 3. Add a description 4. Files are saved to the task

Common attachments: - Photos of work progress - Documents or forms - Reports or measurements

Messages

For longer conversations: 1. Go to **Messages** 2. Find or start a conversation 3. Type and send

Use messages for: - Questions not related to specific tasks - Personal matters - Group coordination

Common Scenarios

Scenario: Starting Your Day

A good morning routine:

1. **Check Dashboard** (5 min)
 - See what's assigned to you
 - Note any urgent items
 - Check notifications
2. **Plan Your Day** (5 min)
 - Which tasks will you work on?
 - Any deadlines today?
 - Priority order
3. **Start Working**
 - Open your first task
 - Click Start
 - Get to work!

Scenario: Task Is Too Big

If a task feels overwhelming:

1. Break it down
2. Create sub-tasks for each part
3. Work on them one at a time
4. Mark each complete as you go
5. Original task done when all sub-tasks done

Example: Big task: “Clean entire barangay hall”

Sub-tasks: - Clean main office - Clean meeting room - Clean restrooms - Clean entrance area - Final inspection

Scenario: Waiting for Someone Else

If you're blocked waiting for someone:

1. Don't just wait silently
2. Add a comment: “Waiting for @Maria to finish electrical work”
3. Message them directly if urgent
4. Tell your manager if it's causing delays
5. Work on something else meanwhile

Scenario: You Found Extra Work Needed

While working, you discover something else needs to be done:

1. Don't ignore it
2. Create a new task for it
3. Assign it appropriately
4. Add comment: “Found this while working on [original task]”
5. Continue your current work

Scenario: You Made a Mistake

If something went wrong:

1. Don't hide it
2. Add a comment explaining what happened
3. Tell your manager
4. Suggest how to fix it
5. Fix it if you can

Honesty is always the best approach.

Scenario: Helping a New Worker

If a new team member needs guidance:

1. Be welcoming
 2. Show them how the system works
 3. Help them understand their first tasks
 4. Answer questions patiently
 5. Let manager know if they need more training
-

Productivity Tips

Getting More Done

1. **Start with urgent tasks** - Don't let them become overdue
2. **One thing at a time** - Multitasking reduces quality
3. **Update status honestly** - If it's in progress, be working on it
4. **Take breaks** - Burnout reduces productivity
5. **Ask questions early** - Don't waste time confused

Staying Organized

1. **Check BarangayLink daily** - Don't miss assignments
2. **Keep task list current** - Update statuses promptly
3. **Use comments** - Document your progress
4. **Plan tomorrow before leaving** - Know what's next

Meeting Deadlines

1. **Know your deadlines** - Check due dates regularly
 2. **Start early** - Don't wait until the last day
 3. **Communicate delays** - Tell people if you'll be late
 4. **Ask for help** - Don't struggle alone
-

Your Daily Routine

Morning (10 min)

- ☐ Log in and check dashboard
- ☐ Review today's tasks
- ☐ Check any notifications
- ☐ Identify top priority for the day

During Work

- ☐ Start timer when beginning task
- ☐ Update progress as needed
- ☐ Add comments for important info
- ☐ Stop timer when taking breaks

End of Day (10 min)

- ☐ Mark completed tasks as done
- ☐ Update any in-progress items
- ☐ Check tomorrow's deadlines
- ☐ Log out

Weekly

- ☐ Review all your assigned tasks
- ☐ Check for overdue items
- ☐ Clean up completed tasks
- ☐ Plan the next week

Quick Reference

Task Status Flow

TODO → IN PROGRESS → IN REVIEW → DONE

↑ ↓

← If revision needed

Priority Meanings

Priority	What It Means	When To Do
Urgent	Critical, must do now	Today, first thing
High	Important	Within 1-2 days
Medium	Normal	This week
Low	When possible	When you have time

Common Actions

I want to...	Do this...
Start working	Click Start on task
Pause work	Click Pause or change to TODO
Finish work	Change to In Review
Ask a question	Add a comment with @name
Share a file	Click Attach on task
Create sub-task	Click + Add Task in project
