

BarangayLink - Manager Manual

A complete guide for Department Managers.

Your Role

As a **Manager**, you lead your department. You create projects, assign tasks, and coordinate your team to get work done. You're the bridge between the Captain's vision and the actual work on the ground.

You're responsible for:

- Creating and managing projects
- Assigning tasks to your team
- Tracking progress and deadlines
- Reporting to leadership
- Supporting your team members

Getting Started

Your Dashboard

When you log in, you see:

- Your department's active projects
- Tasks needing your attention
- Your team's workload
- Upcoming deadlines
- Recent activity

Your Access Level

You can:

- Create projects (need Captain/Admin approval)
- Assign tasks to anyone in your department
- View all work in your department
- Generate department reports
- Message anyone

You cannot:

- Access other departments' private work
- Approve your own projects
- Change system settings
- Manage users outside your department

Creating Projects

This is one of your main responsibilities.

Starting a New Project

1. Go to **Projects**
2. Click + **New Project**
3. Fill in the details:

Title - Clear and descriptive - Good: "Purok 3 Drainage Repair" - Bad: "Road Project"

Description - Explain what needs to be done - What's the problem? - What will we do? - What's the expected outcome?

Timeline - Start Date: When work begins - End Date: Target completion

Budget (if applicable) - Enter the allocated amount - Be realistic

Priority - Urgent: Community safety or deadline-driven - High: Important, needs attention soon - Medium: Normal priority - Low: Nice to have, when resources allow

4. Click **Create Project**
5. Wait for Captain/Admin approval

After Approval

Once approved: 1. You'll get a notification 2. Project status changes to "Active" 3. You can now add tasks 4. Start assigning work to your team

If Changes Requested

If sent back for revision: 1. Read the feedback carefully 2. Click **Edit** on the project 3. Make the requested changes 4. Add a comment explaining updates 5. Resubmit for approval

Managing Tasks

Tasks are the building blocks of your projects.

Creating a Task

1. Open your project
2. Click + **Add Task**
3. Fill in details:

Title - Specific and actionable - Good: "Survey drainage damage in Purok 3" - Bad: "Do survey"

Description - What exactly needs to be done

Assigned To - Pick team members - Can assign to multiple people - Consider workload balance

Due Date - When should this be done?

Priority - Urgent, High, Medium, or Low

Story Points (optional) - Estimate effort required - Helps with workload planning

4. Click **Create Task**
5. Assigned people get notified

Task Status Workflow

Tasks move through these stages:

TODO → IN PROGRESS → IN REVIEW → DONE

- **TODO** - Not started yet
- **IN PROGRESS** - Someone is working on it
- **IN REVIEW** - Done, waiting for verification
- **DONE** - Completed and verified

Reviewing Completed Tasks

When a task is “In Review”:

1. Open the task
 2. Review what was done
 3. Check any attachments or notes
 4. If good, move to **DONE**
 5. If needs more work, send back to **IN PROGRESS** with comments
-

Using the Kanban Board

Visual way to manage all tasks.

Accessing Kanban

1. Open your project
2. Click **Kanban** or **Board View**
3. See all tasks organized by status

How It Works

Tasks appear as cards in columns: - **To Do** column - **In Progress** column - **In Review** column - **Done** column

Moving Tasks

- **Drag and drop** cards between columns
- This changes their status
- Team members get notified

Best Practices

- Review the board daily
- Keep “In Review” column small (process quickly)
- Watch for stuck tasks (same column too long)
- Use filters to focus on specific people or priorities

Team Management

Know your team and manage their workload.

Viewing Your Team

1. Go to **Dashboard** → **Team Workload**
2. See all department members
3. Each person shows:
 - Assigned tasks count
 - Current workload
 - Task completion rate

Balancing Workload

Signs someone is overloaded: - More than 10 active tasks - Many overdue items - Low completion rate

Signs someone has capacity: - Few active tasks - Completing work quickly - Good completion rate

How to rebalance: 1. Open a task 2. Click **Edit** 3. Change assigned person 4. Save

One-on-One Check-ins

Regularly talk to your team: - What's blocking them? - Do they have what they need? - Any concerns?

Use the system to prepare: 1. Review their tasks before meeting 2. Note any overdue items 3. Discuss workload

Milestones

Break big projects into checkpoints.

Creating Milestones

1. Open your project
2. Go to **Milestones**
3. Click + **Add Milestone**
4. Enter:
 - Title (e.g., "Phase 1 Complete")
 - Target Date
 - Description

5. Link related tasks

Why Use Milestones

- Break big projects into manageable chunks
- Celebrate progress along the way
- Easier to track and report
- Early warning if falling behind

Example Milestones

For a “Build Basketball Court” project: 1. Site Prepared - Week 2 2. Foundation Poured - Week 4 3. Posts Installed - Week 6 4. Court Surface Done - Week 8 5. Final Paint & Lines - Week 9 6. Inspection Complete - Week 10

Reports

Track and communicate progress.

Project Reports

Generate reports showing: - Overall completion percentage - Tasks completed vs pending - Budget spent vs allocated - Timeline status

How to generate: 1. Open your project 2. Click **Reports** or **Export** 3. Choose format (PDF or Excel) 4. Download

Team Reports

See your team’s performance: 1. Go to **Dashboard** → **Analytics** 2. Filter by your department 3. View: - Task completion rates - Average time per task - Individual performance

When to Report

- **Weekly** - Update to Captain on progress
 - **Monthly** - Department summary
 - **Project completion** - Final report
-

Common Scenarios

Scenario: Starting a New Month

Beginning of each month:

1. **Review Last Month**

- Check what was completed
 - Note what carried over
 - Generate summary report
2. **Plan New Month**
 - List priorities
 - Create any new projects needed
 - Assign initial tasks
 3. **Team Meeting**
 - Share the plan
 - Get input
 - Assign responsibilities

Scenario: Project Falling Behind

When a project is late:

1. **Identify the Problem**
 - Which tasks are delayed?
 - Why are they delayed?
 - Is it people, resources, or scope?
2. **Take Action**
 - Reassign tasks if someone is stuck
 - Add resources if needed
 - Break big tasks into smaller ones
 - Extend deadline if necessary (communicate this)
3. **Prevent Future Issues**
 - More realistic timelines
 - Better task breakdown
 - Earlier escalation of problems

Scenario: Team Member Not Performing

If someone isn't completing work:

1. Check their task list - are they overloaded?
2. Look at recent activity - are they logging in?
3. Talk to them directly
4. Document the conversation
5. Escalate to Admin if persistent

Scenario: Urgent Request from Captain

When something urgent comes in:

1. Don't panic
2. Assess your team's capacity
3. Reprioritize if needed
4. Create the task with "Urgent" priority

5. Assign to available team member
6. Communicate clearly what's needed
7. Monitor closely

Scenario: Budget Running Low

If project is exceeding budget:

1. Check where money is going
 2. Are expenses legitimate?
 3. Can anything be cut?
 4. Document the situation
 5. Talk to Captain before running out
 6. Request additional funds if justified
-

Event Management

For department-related events.

Creating an Event

1. Go to **Events**
2. Click + **New Event**
3. Fill in:
 - Title and description
 - Date and time
 - Location
 - Maximum attendees
4. Add event tasks
5. Assign staff duties
6. Publish when ready

Managing Event Tasks

1. Open your event
2. Click **Event Control**
3. Assign duties to team members
4. Track completion during event

After the Event

1. Download attendance report
2. Review task completion
3. Gather feedback
4. Document what went well and what didn't
5. Apply lessons to future events

Communication

Stay connected effectively.

Project Comments

Use comments for project-related discussion: 1. Open the project or task 2. Scroll to comments section 3. Write your message 4. @mention people to notify them

Direct Messages

For private or sensitive matters: 1. Go to **Messages** 2. Start new conversation 3. Select the person 4. Write your message

Department Chat

Create a group for your team: 1. Go to **Messages** 2. Click **New Group** 3. Add all department members 4. Use for quick updates and coordination

Your Daily Routine

Morning (20 minutes)

- ☐ Check notifications
- ☐ Review Kanban board
- ☐ Process any “In Review” tasks
- ☐ Check today’s deadlines
- ☐ Answer messages

Midday

- ☐ Follow up on urgent items
- ☐ Check team progress
- ☐ Address any blockers

End of Day (15 minutes)

- ☐ Update task statuses if needed
- ☐ Clear your inbox
- ☐ Plan tomorrow’s priorities
- ☐ Note any issues for follow-up

Weekly

- ☐ Team workload review
 - ☐ Project progress check
 - ☐ Report to Captain
 - ☐ Plan next week
-

Tips for Success

1. **Plan before you assign** - Think through tasks before creating them
 2. **Be specific** - Clear task descriptions prevent confusion
 3. **Balance workloads** - Don't overload your best people
 4. **Review daily** - 15 minutes prevents big problems
 5. **Communicate expectations** - People need to know priorities
 6. **Celebrate wins** - Acknowledge completed work
 7. **Document everything** - Comments and notes help later
 8. **Ask for help** - Escalate before things become crises
-

Quick Reference

Task Priority Guide

Priority	Use When
Urgent	Safety issue, hard deadline, Captain's request
High	Important, needed this week
Medium	Normal work, standard timeline
Low	Nice to have, when there's time

Status Meanings

Status	Who Acts
TODO	Worker picks it up
IN PROGRESS	Worker is doing it
IN REVIEW	You review it
DONE	Work is complete

Response Time Goals

- Urgent tasks: Respond same day
- High priority: Within 2 days
- Medium: Within the week
- Low: When possible
