

BarangayLink v2 - User Manual

A complete guide for using the BarangayLink barangay management system.

Getting Started

First Time Login

1. Open your browser and go to your BarangayLink website
2. Click **Login** or **Register** if you're new
3. Enter your email and password
4. If this is your first time, wait for admin approval
5. Once approved, you'll see your dashboard

Your Dashboard

After logging in, you'll see your personalized dashboard showing: - Tasks assigned to you - Upcoming events - Recent notifications - Quick stats about your work

Understanding Your Role

BarangayLink has 5 user roles. Each role has different permissions and responsibilities.

ADMIN

Who you are: System administrator with full control.

What you can do: - Manage all users and approve new registrations - Configure system settings - Access all projects and events - Create and manage departments - Generate system-wide reports - Backup and restore data

Your typical day: 1. Check pending user approvals 2. Review system notifications 3. Monitor overall project progress 4. Handle escalated issues 5. Generate weekly reports

CAPTAIN

Who you are: Barangay Captain or Vice Captain with oversight of all operations.

What you can do: - View all projects across departments - Approve major project proposals - Oversee event planning - Access analytics and reports - Manage department heads

Your typical day: 1. Review project status updates 2. Approve pending projects 3. Check upcoming community events 4. Meet with department managers 5. Review resident concerns

Common scenarios:

Scenario: Approving a new infrastructure project 1. Go to **Projects** → **Pending Approval** 2. Click on the project to review details 3. Check the budget, timeline, and assigned team 4. Click **Approve** or **Request Changes** 5. Add comments if needed

Scenario: Checking event attendance 1. Go to **Events** → Select the event 2. Click **Control Panel** 3. View real-time attendance numbers 4. Download attendance report if needed

MANAGER

Who you are: Department head who coordinates projects and teams within your department.

What you can do: - Create projects for your department - Assign tasks to builders and workers - Manage your team's workload - Track project budgets - Generate department reports

What you cannot do: - Access other departments' private projects - Approve your own projects (needs Captain/Admin) - Change system settings

Your typical day: 1. Check your team's task progress 2. Update project milestones 3. Assign new tasks as needed 4. Review completed work 5. Communicate with your team

Common scenarios:

Scenario: Creating a new project 1. Go to **Projects** → Click **+ New Project** 2. Fill in the project details: - Title: "Road Repair - Purok 3" - Description: What needs to be done - Start Date and End Date - Budget (if applicable) 3. Click **Create Project** 4. Wait for Captain/Admin approval

Scenario: Assigning tasks to your team 1. Open your project 2. Click **+ Add Task** 3. Enter task details: - Title: "Survey damaged areas" - Priority: High, Medium, or Low - Due date - Assigned to: Select team members 4. Click **Create Task** 5. Team members will be notified

Scenario: Checking team workload 1. Go to **Dashboard** → **Team Workload** 2. See who has too many tasks 3. Reassign tasks if someone is overloaded 4. Balance work across your team

BUILDER

Who you are: Senior staff member who creates tasks and helps manage projects.

What you can do: - Create tasks within assigned projects - Update task status - Log work hours - View project details - Collaborate with team members

What you cannot do: - Create new projects (only Managers can) - Access projects you're not assigned to - Approve or reject work

Your typical day: 1. Check your assigned tasks 2. Update task progress 3. Create sub-tasks if needed 4. Log your work hours 5. Mark completed tasks as done

Common scenarios:

Scenario: Working on a task 1. Go to **My Duties** or **Dashboard** 2. Find your assigned task 3. Click **Start** to begin working 4. The timer starts automatically 5. When done, click **Submit for Review**

Scenario: Creating a sub-task 1. Open the main task 2. Click **+ Add Subtask** 3. Enter what needs to be done 4. Assign it to yourself or a teammate 5. Track progress separately

Scenario: Logging extra hours 1. Open the task you worked on 2. Click **Log Time** 3. Enter hours and what you did 4. Submit the time entry

WORKER

Who you are: Team member who completes assigned tasks.

What you can do: - View tasks assigned to you - Update your task status - Clock in and out of tasks - View event schedules - Receive notifications

What you cannot do: - Create new tasks or projects - Assign work to others - Access unassigned projects

Your typical day: 1. Check your task list 2. Clock in to start working 3. Complete your assigned tasks 4. Update status when done 5. Clock out at end of day

Common scenarios:

Scenario: Starting your work day 1. Login to BarangayLink 2. Go to **My Duties** 3. See all tasks assigned to you 4. Click on a task to see details 5. Click **Clock In** to start

Scenario: Completing a task 1. Finish the actual work 2. Open the task in BarangayLink 3. Change status to **Done** or **For Review** 4. Add any notes about what you did 5. Your manager will be notified

Scenario: Reporting a problem 1. Open the task 2. Click **Add Comment** 3. Describe the issue you encountered 4. Your manager will see it and respond

Main Features

Projects

Projects are the core of BarangayLink. They represent major initiatives like infrastructure improvements, community programs, or special events.

Project Status: - **Planning** - Still being organized - **Active** - Work is ongoing - **Completed** - All tasks finished - **On Hold** - Temporarily paused

How to track progress: - Each project shows a progress bar - Progress is calculated from completed tasks - Click on a project to see detailed breakdown

Events

Events are community activities like fiestas, clean-up drives, or meetings.

Creating an Event (Managers and above): 1. Go to **Events** → + **New Event** 2. Enter event details: - Title and description - Date, start time, end time - Location (you can pick on map) - Maximum attendees 3. Set if it's public or private 4. Create tasks for the event 5. Publish the event

Event Control Panel: - Real-time attendance tracking - Task assignment and monitoring - QR code for easy check-in - Guest registration

For Workers - Event Duties: 1. Check **My Duties** for event tasks 2. See what you're assigned to do 3. Clock in when you arrive 4. Complete your tasks 5. Clock out when done

Tasks

Tasks are specific work items within projects or events.

Task Status Flow:

TODO → IN PROGRESS → IN REVIEW → DONE

Task Priority: - **Urgent** - Do immediately - **High** - Do today - **Medium** - Do this week - **Low** - Do when you can

Working on Tasks: 1. Find your task in **My Duties** 2. Click to open task details 3. Click **Start** or change status to **In Progress** 4. Work on the task 5. When finished, change to **In Review** or **Done**

Kanban Board

The Kanban board gives you a visual view of all tasks organized by status.

Columns: - **To Do** - Tasks waiting to be started - **In Progress** - Tasks being worked on - **In Review** - Tasks waiting for approval - **Done** - Completed tasks

How to use: - Drag tasks between columns to change status - Click a task to see full details - Use filters to find specific tasks - Great for team meetings to review progress

Milestones

Milestones are major checkpoints within a project.

Example milestones for a road project: 1. Survey Complete - Week 1 2. Materials Purchased - Week 2 3. Construction Started - Week 3 4. Construction Complete - Week 6 5. Final Inspection - Week 7

Tracking milestones: - Each milestone shows target date - Progress based on related tasks - Red = overdue, Yellow = at risk, Green = on track

Documents

Store and share files related to projects.

Supported files: - Images (JPG, PNG) - PDFs - Word documents - Excel spreadsheets

Uploading documents: 1. Go to **Documents** or open a project 2. Click **Upload** 3. Select your file 4. Add tags for easy searching 5. File is automatically saved

Messages

Built-in chat system for team communication.

Features: - Direct messages to any user - Group chats for teams - File sharing in chat - Read receipts

Starting a conversation: 1. Go to **Messages** 2. Click **New Chat** 3. Select who to message 4. Type and send your message

Notifications

Stay updated on what's happening.

You'll be notified when: - You're assigned a new task - Someone mentions you - A deadline is approaching - Your task is approved or needs revision - New announcements are posted

Managing notifications: 1. Click the bell icon 2. See all recent notifications 3. Click one to go to that item 4. Mark as read or clear all

For Administrators

User Management

Approving new users: 1. Go to **Admin** → **Pending Approvals** 2. Review each registration 3. Check their email and details 4. Assign appropriate role and department 5. Click **Approve** or **Reject**

Changing user roles: 1. Go to **Admin** → **Users** 2. Find the user 3. Click **Edit** 4. Change their role 5. Save changes

Deactivating users: 1. Find the user in **Admin** → **Users** 2. Click **Deactivate** 3. User can no longer login 4. Their data is preserved

System Settings

Barangay Information: - Update barangay name and details - Set the hall location on map - Configure working hours

Backup & Restore: 1. Go to **Admin** → **Settings** → **Backup** 2. Click **Create Backup** 3. Download the backup file 4. Store it safely

To restore: 1. Go to **Backup** section 2. Click **Import Backup** 3. Select your backup file 4. Choose merge or replace mode 5. Wait for completion

Departments

Creating a department: 1. Go to **Admin** → **Departments** 2. Click **+ Add Department** 3. Enter name and description 4. Assign a department head 5. Save

Managing departments: - Edit department details anytime - View all members - See department statistics - Transfer users between departments

Tips for Success

For Everyone

1. **Check your dashboard daily** - Stay updated on your tasks
2. **Update task status** - Helps everyone know where things stand
3. **Use comments** - Communicate issues or progress
4. **Don't ignore notifications** - They're important

For Managers

1. **Balance workloads** - Don't overload one person
2. **Set realistic deadlines** - Give enough time
3. **Review regularly** - Check progress weekly
4. **Give feedback** - Help your team improve

For Workers

1. **Clock in on time** - Your hours are tracked
2. **Ask if confused** - Use comments to ask questions
3. **Update status** - Don't leave tasks stuck
4. **Complete high priority first** - Urgent tasks come first

Common Questions

Q: I forgot my password A: Click "Forgot Password" on the login page. Check your email for reset link.

Q: I can't see a project A: You might not be assigned to it. Ask your manager to add you.

Q: My task is stuck A: Check if it needs review. Ask your manager if there's an issue.

Q: How do I change my profile picture? A: Go to your profile (click your name), then click on your picture to upload a new one.

Q: Can I work offline? A: Limited features work offline. Your changes sync when you're back online.

Q: Who do I contact for help? A: Contact your department manager first. For system issues, contact the Admin.

Glossary

Term	Meaning
Dashboard	Your home page with overview of your work
Project	A major initiative with multiple tasks
Event	A scheduled community activity
Task	A specific work item to complete
Milestone	A major checkpoint in a project
Kanban	Visual board showing tasks by status
Clock In/Out	Recording when you start and stop work
Department	A division within the barangay (e.g., Infrastructure, Health)
